

A top-down view of a beach scene. In the upper left, a portion of a light brown woven straw hat is visible. Below it, a brown leather strap with metal buckles lies on a towel. The towel features horizontal stripes of yellow and purple. A white, five-armed starfish is placed on the purple stripe. To the right of the starfish, a pair of black flip-flops with silver studs on the straps is laid out. The entire scene is set on a light-colored sandy beach, with the white foam of ocean waves washing onto the shore in the upper right corner.

**RELAX WITH  
THE PERFECT FIT**

# Step by Step finding your Feet.....Size

- Our aim is to provide you with the best fitting thongs from our range.
  - To do this we highly recommend you follow the instructions in this tutorial
  - The best way is for you to measure your foot so we can get it right for you.
  - Once you have measured your foot put the measurement in the **Foot Measurement** tab in the **Design Workshop** please enter the measurement in Centimetres to avoid confusion e.g. 24.3CM
  - This also allows us to double check your choice in size when building your Masterpiece.
1. Place your foot on a piece of paper and trace around it as shown on the following page.
  2. Use a ruler to measure from the tip of your toe to your heel on the outline you have just traced.  
Make sure you do it at the correct angle like the picture shows.
  3. Use the table on the last page to get the best size for you.
  4. If your measurement is at the extreme of one of the sizes in the table, please choose a size to your preferred style, choose the smaller size if you like a tighter fit or the larger size if you like your thongs looser.
  5. We are always here to help, please contact us at [solutions@whatsyourmo.com.au](mailto:solutions@whatsyourmo.com.au) and we can answer any questions.

# Tracing an Outline of Your Foot

Place your foot on a piece of paper and trace an outline  
(Warning: May tickle a little bit)

Mark the toe at the end of your toe  
NOT where your toe touches  
the floor.

When marking your heel make sure  
you mark where your heel touches  
the floor.

# Measuring from Heal to Toe

Measure the outline that you have traced as shown in the diagram.  
Remember to measure on the inside of your pen marks as this makes it more accurate.

This foot measures **24.2CM**  
and so is suited for a **SIZE: 37-38**

See the chart below for your size
